

REMANUFACTURED ENGINES

For over 60 years, the engines we sell have set the industry standard, offering high-quality that exceeds industry standards with same-as-new performance.

Here are some of the reasons we've developed such a reputation for quality and reliability over the years:

Quality Advantage

- Engine air tested
- Cold run test
- Computerized air gapping
- No Welding
- No Heli-coils

Machining Capabilities

- Six CNC horizontal machining centers
- Robotics
- CNC crankgrinder
- CNC honing

Unequaled quality control

- ISO-9002, QS-9000, ISO-14000
- Six Sigma
- Two coordinate measuring machines – the latest in deck and cylinder surface finish measuring equipment

Assembly

- DC-torqueing of critical fasteners
- Variable lines-flexible-expandable-quick start up
- End-of-line spin testing for oil flow, compression and torque

Applications

- Ford
- GM
- Nissan
- Landrover
- Marine
- Chrysler
- Toyota
- Honda
